

REGU
JAW

Regu Jaw

is a technologically sophisticated device for achieving oral health.

Product Description

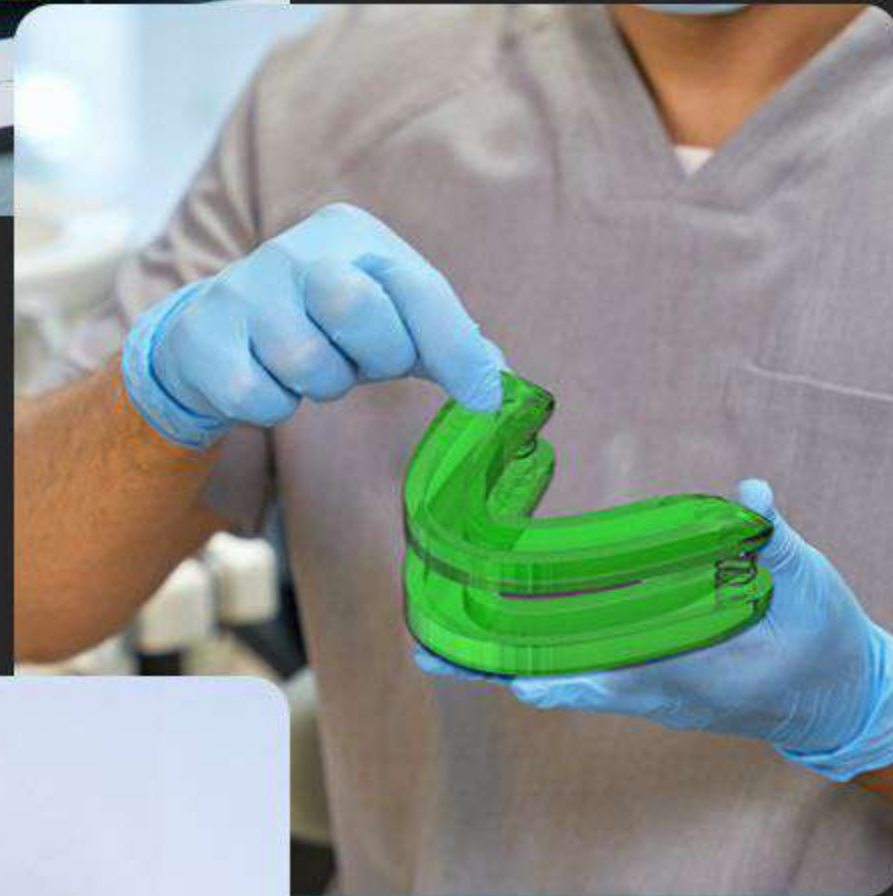

Introducing Regu Jaw, an innovative device engineered to tackle jaw misalignment, gum weakness, and insufficient oral muscle strength. This smart solution detects and corrects jaw issues, all while fortifying your teeth, gums, and jaw muscles for optimal oral health.

Features

- Measuring the force exerted by the teeth
- Aligning tooth positioning
- Reinforcing teeth and jaw muscles
- Detecting jaw misalignment

Regu Jaw boasts top features including the ability to measure the force exerted by your teeth, precisely align tooth positioning, and reinforce both teeth and jaw muscles. This device ensures optimal dental health and effective correction of jaw-related issues.

Innovation points of Regu Jaw

- **Weakness Detection:** Advanced technology for identifying weak areas in the gums, teeth, and jaw muscles, ensuring targeted reinforcement.
- **Movement Correction:** Precision correction of tooth and jaw alignment, enhancing overall oral health and functionality.
- **Progress Tracking and Monitoring:** Comprehensive system for tracking and monitoring improvement, providing real-time feedback on treatment progress.
